

Get in Gear! Recycle Used Oil

Did You Know ...

- San Diegans recycled more than 140,000 gallons of used oil last year?
- You can get cash for your used oil? California has initiated a \$.04 per quart fee on purchases of motor oil which businesses refund when you bring in your used oil or offer a coupon. Businesses authorized to return the fee or offer a coupon are called certified centers.
- Oil filters can be recycled? To properly do so, drain your filter and put it in a sealable bag or in a coffee can. Car batteries and antifreeze should also be disposed of properly. You can return dead batteries to suppliers or recycling facilities.
- Almost 80 million gallons of used oil are recycled each year in California?

The City of San Diego Used Oil Program wants to make sure you know how easy it is to recycle your oil. There are almost 90 certified centers recycling used oil in the City of San Diego, with the centers in your neighborhood listed on the back.
